

Gripper Conveyor

Reliable Vertical Product Transfer

Spec Sheet

The Modu Gripper Conveyor is designed for gentle, controlled product handling on downward vertical paths. Its fully adjustable width and soft wiper wedge grippers make it ideal for transferring a wide range of containers and packets.

SPECIFICATIONS

- Start height: 1850 mm
- Finish height: 800 mm
- Drop distance: 1000 mm
- Frame: 80×80 mm alloy square Modu frame system
- Drive: Twin interconnected motors with Variable Speed Drives
- Adjustability: Rapid width changes via handwheel
- Modular design adaptable to many layouts

APPLICATIONS

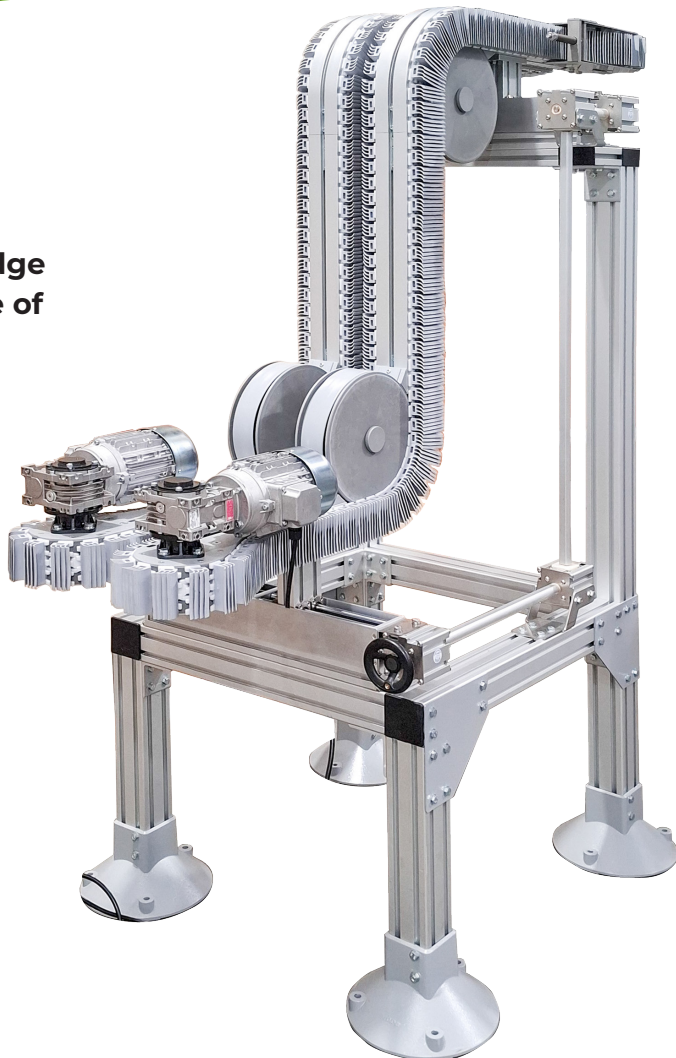

- Empty or filled bottles
- Small cartons and packaged goods
- Reliable descending transfers on production lines
- Inverting products for sterilisation of cap seals
