

Spiral Conveyor

Compact, Efficient Product Handling

Spec Sheet

The Modu Spiral Conveyor is a continuous, space-saving solution for safe and efficient product movement. Supported by a central pillar, it delivers smooth vertical transport without compromising floor space.

SPECIFICATIONS

- Conveyor height: 800 mm (start) to 1850 mm (exit)
- Maximum product height: 200 mm
- Maximum product width: 110 mm
- 83mm Chain: Low-friction Acetal with grip surface for incline traction
- Spiral centre line diameter: 700 mm, fits within 1.0 m square
- Capacity: Up to 150 containers per minute
- Product guides: Plastic-trimmed aluminium rails to protect products
- Safety: Chain returns within extrusion, very quiet
- STM shaft mounted 3 phase geardrive

APPLICATIONS

- Bottles, cans, jars, cartons, packets, and small retail packs
- Accumulation for product cooling or heating
- Continuous production where space is limited
- Buffering between processes such as bottle capping and labelling
